Valid 30 days

What this is

One system with three screens. Waiters take orders on tablets. The counter takes payment, prints receipts and files with KRA. The console handles stock, purchasing, pricing and reporting.

KES

50,000

Fixed fee for the scope in section four. A KES 10,000 deposit on confirmation, then four payments against delivered work. Exclusive of VAT.

Delivery	Six weeks from the deposit clearing.
Payments	Five. The deposit, then one for each screen as it goes live, then handover.
Scale	One outlet, bar and shop off one stock room. Up to twelve staff accounts and four tablets.
Tenders	Cash, M-Pesa through Daraja, and card recorded as a tender.
Compliance	KRA eTIMS filing, excise stamp records, VAT, and licence trading hours.
Hardware	Specified by us, bought by you.
After go live	Thirty days of hypercare included. Ongoing support quoted separately.
Your data	Yours, exportable in open formats, no exit fee.

Three screens, one set of records

Each screen is built for one job. All three read and write the same records, so nothing is entered twice.

01

Floor

Waiters, on tablets

Table, drink, fire. The bar has the order in under three seconds.

- Open, move, split and hand over tabs, with the running total always on screen
 - Keeps working with the Wi-Fi down and sends everything when it returns
 - Every line carries a name and a time. Voids need a written reason.
-

02

Counter

Cashier, at the till

Payment, printing, and sealed bottle sales off the same stock as the bar.

- Cash, an M-Pesa push to the customer's phone, and card, split across one bill
 - Receipt and KRA tax invoice printed on settlement
 - Drawer opened on a counted float, closed on a blind count with reasons recorded
-

03

Console

Owner and manager, in a browser

Purchasing, stock, pricing, people and reporting.

- Purchase orders, goods receipt, and the KRA excise stamp recorded per bottle
- Blind stock counts, pour variance, margin by line and dead stock
- Voids and discounts by staff member, and an audit trail with no hard deletes

How it handles local conditions

Five things that separate this from an imported retail product with M-Pesa added to the side.

Power and internet failure

Each device holds what it needs. Trading continues when the line drops, and nothing double counts when it returns. Offline is a supported operating mode, not a failure state.

M-Pesa as the primary rail

A push goes to the customer's phone and the result appears on the counter screen before they leave. Payments made directly to the till land in a queue to be attached to a bill.

KRA eTIMS

Invoices queue locally when the connection is down and transmit in order when it returns, with no gaps in the sequence. Failed transmissions are visible and can be retried.

Excise stamps

The KRA stamp on each bottle is scanned at delivery. That gives a record from supplier to shelf and flags any code already in the system. Solera records and flags stamps. It does not confirm authenticity with KRA, because KRA publishes no such facility to software, so a flagged stamp is shown to you to check against KRA's Soma Label app.

Licence trading hours

Your trading window is configured once. Settlement outside it is blocked, with a supervisor override that records a name and a reason and appears in a report.

What the fee covers

INCLUDED

Discovery, catalogue structuring and price lists

Design and a clickable prototype of all three screens

Floor app for tablets, working offline

Counter till with cash, M-Pesa and card

Split bills, part payments and approved refunds

Receipt and KRA tax invoice printing

Cash drawer sessions with blind close

Sealed bottle sales off the same stock

Management console with ten workspaces

Suppliers, purchase orders and goods receipt

Excise stamp capture with duplicate detection

Stock ledger, blind counts and pour variance

Recipes, pricing, happy hour and staff rates

Roles, permissions and per person reporting

KRA eTIMS integration and certification support

Trading window enforcement, logged overrides

Full audit trail, and CSV export for your accountant

Staff training and a printed card per role

Parallel running before cutover

Thirty days of hypercare after go live

NOT INCLUDED

Hardware

Specified by us, bought by you

Hosting and third party service costs

Passed on at cost, or set up under your own accounts

Loyalty, online ordering, delivery apps, reservations

Payroll

Hours and sales export, pay is not calculated

A full general ledger

Clean exports, not an accounting package

Card terminal integration

Card is recorded as a tender

Integration to a named accounting product

Migration beyond a one time catalogue import

Multi branch consolidation reporting

KRA, county and licence fees

AVAILABLE LATER

Anything on the right is quoted separately once the system is live.

ASSUMED

One outlet with a bar and a shop off one stock room. Up to twelve staff accounts and four floor devices. A catalogue under 1,200 lines. A valid county liquor licence, a KRA PIN and VAT registration.

Six weeks, five payments

A deposit on confirmation, then one payment for each screen as it goes live, then handover. Nothing after the deposit is invoiced until you have used the part it covers.

01	Deposit	On signing	20%	10,000
Books the team, starts discovery, and opens KRA eTIMS registration.				
02	Console	Week 2	25%	12,500
Live with your catalogue, suppliers and prices, plus roles and the audit trail. The other two screens are built on it.				
03	Counter	Week 4	25%	12,500
Cash, M-Pesa, split payments, printed receipts, cash drawer and a day close you can sign.				
04	Floor	Week 5	20%	10,000
Tablets through a live service alongside your current process, including a deliberate network outage with nothing lost.				
05	Handover	Week 6	10%	5,000
eTIMS transmitting, a stock count completed, staff trained, documentation delivered. Hypercare begins.				
Total, exclusive of VAT			100%	50,000

How a payment is released

We hand over the deliverable, you use it, and the invoice follows once you accept it. Acceptance tests are agreed at the design stage, so acceptance is a test rather than an opinion.

KRA certification

eTIMS vetting runs four to eight weeks on KRA's timeline and can outlast the build. Until it clears, the system trades in a compliant holding mode and back files on approval. It does not delay go live.

Your part, and the terms

WHAT WE NEED FROM YOU

A decision maker	One person who can approve a price list, available two hours a week in a fixed slot.
Your catalogue	Every product, size and current price.
Buying prices	Your suppliers and what you pay them. Margin cannot be calculated without them.
A floor champion	One senior waiter to test the tablets and report what does not work.
KRA access	Credentials and eTIMS registration started in week one.

Payment

Payable within fourteen working days of acceptance. Acceptance is deemed given if nothing is raised in writing within five working days. Late payment attracts two per cent a month, and work pauses at thirty days overdue.

Currency and tax

Kenya Shillings, exclusive of VAT at the prevailing rate where it applies.

Changes

Anything outside section four needs a written change order with its own price and date. Two free swaps are included: exchange one item in scope for another of equal or smaller effort, twice, at no cost.

Your data

Yours, exportable in open formats, with no exit fee and no notice period.

Confidentiality

Your figures, cost prices, supplier terms and staff information are never used in any case study or published material without your written consent.

Data protection

[VENUE] is the data controller and Andishi is a processor, under a written agreement forming part of the contract. Customer numbers are held hashed with only the last four digits visible.

Warranty

Defects reported within ninety days of go live are fixed at no charge. A defect is behaviour that does not match this document. New requirements found during use are changes.

Ending it

Either side may stop in writing with fourteen days notice. Work accepted to that point is payable, and everything built and paid for is handed over with documentation.

Acceptance

Signing below accepts the scope in section four, the milestones and fee in section five, and the terms in section six.

Project	Solera, point of sale and stock control for [VENUE]
Reference	ANDISHI/SOL/2026/001
Fee	KES 50,000.00, exclusive of VAT, across five payments
Deposit	KES 10,000.00 on confirmation
Delivery	Six weeks from the deposit clearing
